*Series*

European Technology • 2-Component Polyurethane  
Shop Formulated Dry Time • Durable • Easy To Apply

# EURO X™

The new Euro Series from M.L. Campbell combines the craftsmanship of European wood finishing technology with easy-to-apply characteristics. The Euro X line is the first group of **exterior** products available in the Euro Series. Euro X offers durability and a drying time that is ideal for shop applications. Superior elasticity allows the finishes to flex with the wood's natural contractions and expansions due to changes in humidity and temperature. In addition, each Euro X offering provides excellent resistance to chemicals, UV exposure and scratches.

Leading North American Brand

M.L. Campbell's Euro X™

A UV and moisture spray test was conducted by an independent third party and offers dramatic proof as to the performance of Euro X versus the leading exterior clear sold in North America today. This test was conducted with 1,500 hours of Xenon Arc and Weatherometer exposure and intervals of 102 minutes of UV light followed by 18 minutes of UV light and water spray. The test criteria were fading, cracking, chipping and blistering. See photos above for direct side-by-side comparison.

**EURO X PIGMENTED - EU 307 Series** – Euro X Pigmented is a 2-component polyurethane for use on exterior wood when a very hard, long-lasting finish is required. Provides an excellent (high solids) finish that is scratch and mar resistant and provides excellent moisture resistance. Available in white or unlimited colors.

**EURO X CLEAR “WET LOOK” - EU 30878** – Euro X “Wet Look” is a clear, 2-component polyurethane for use on exterior wood when a very hard, long-lasting finish is required. Provides an excellent (high solids) finish that is scratch and mar resistant and provides excellent moisture resistance. This product can also be used for interior use.

**EURO X CLEAR - EU 309 Series** – Euro X Clear is a clear, 2-component polyurethane for use on exterior wood when a very hard, long-lasting finish is required. Provides an excellent (high solids) finish that is scratch and mar resistant and provides excellent moisture resistance.

**EURO X SUPER SEALER - EU 31089** – Euro X Super Sealer is based on a European style 2-component polyurethane that offers exceptional adhesion and chemical resistance. Euro X Super Sealer's high solids formula was specifically designed for exterior wood surfaces that are exposed to moisture, heat and chemicals.

**EURO EXOTIC WOODS SEALER - EU 32079** – Specifically designed to seal oily exotic woods like teak, Brazilian cherry and rosewood to create a good adhesion base for Euro Series exterior or interior topcoats.

**EURO REDUCER - EU 31197** – Euro Reducer is a blend of special evaporating solvents specifically formulated for Euro X products.

**EURO RETARDER - EU 31297** – Euro Retarder is a blend of special evaporating solvents which are intended to correct most leveling and flow problems. Euro Retarder contains no aromatic or ketone solvents.

**GREEN CATALYST - EU 31477** – Euro Green catalyst was specially developed for use with Euro X Pigmented (EU 307 Series).

**BLUE CATALYST - EU 31577** – Euro Blue catalyst was specially developed for use with Euro X Clear “Wet Look” (EU 30878) and Euro X Super Sealer (EU 31089).

**YELLOW CATALYST - EU 31677** – Euro Yellow catalyst was specially developed for use with Euro X 2K clear finish (EU 309 Series).

**BLACK CATALYST - EU 31877** – Euro Black catalyst was specially developed for use with Euro Exotic Woods Sealer (EU 32079).

**EURO X MAINTENANCE COAT - EU 33005 (U.S.) and EU 33005C (CDA)** – Designed for the homeowner as a water borne brush applied finish to prolong the life of exterior doors and trim that have been previously finished with Euro X Clear. Also used by installers to coat cut or planed edges of doors. Available in satin sheen. Sizes include gallons and quarts.
